Debug and Test a Capsule

Bixby Developer Studio

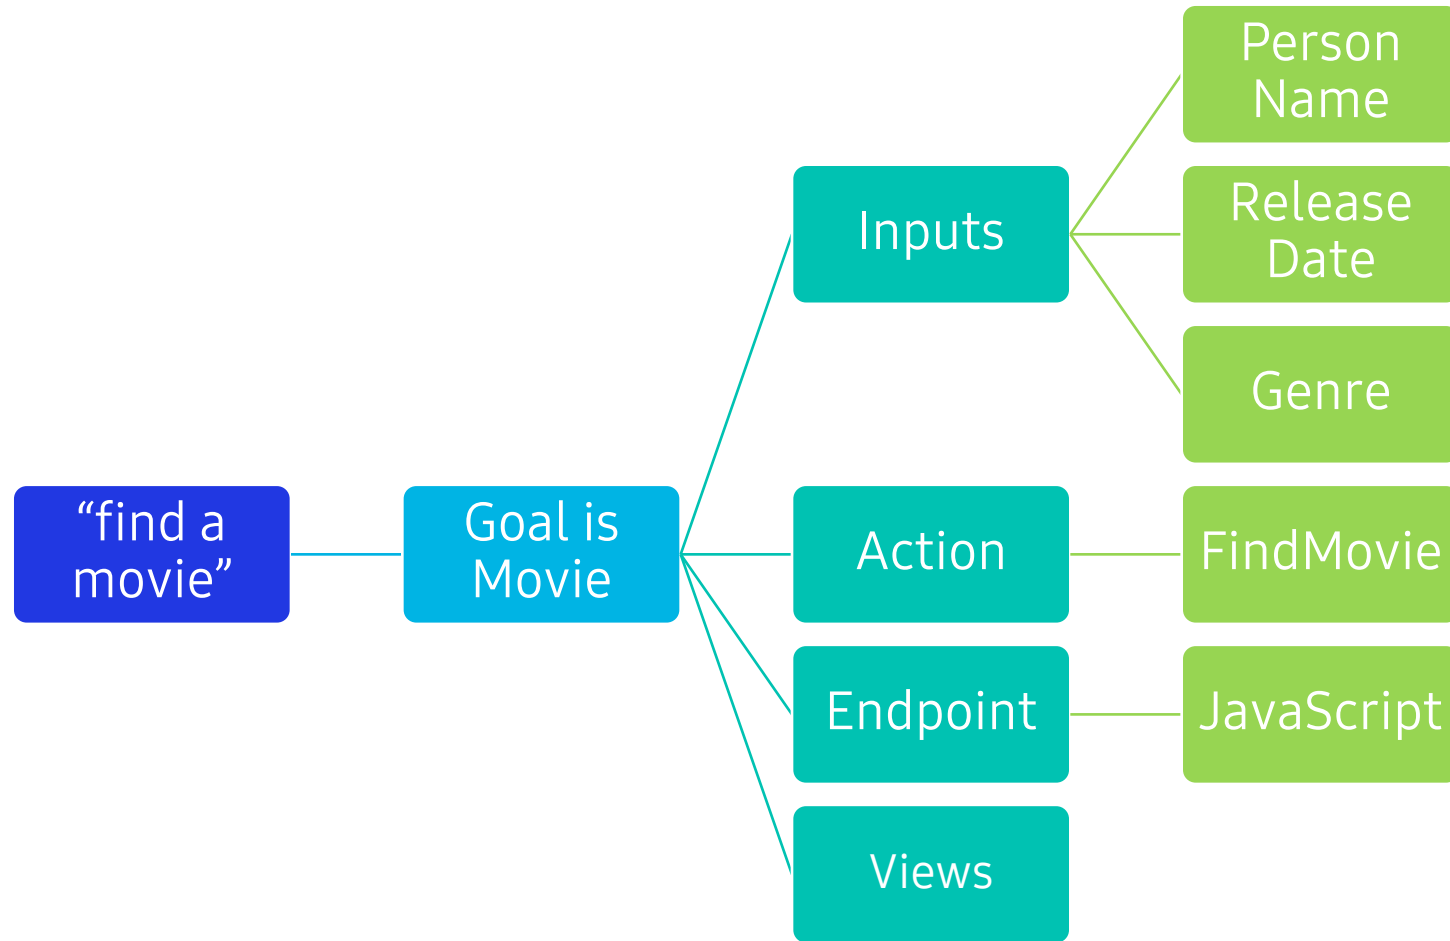

- desktop application
- create voice assistant applications, or “capsules”
- edit local files
- sync them with Bixby in the cloud
- define concepts and actions

Movie Agent Capsule

- helps people choose a movie
- searches by genre, actor name or release date
- connects to a real REST API

<https://github.com/bixbydevelopers/capsule-sample-movie-agent>

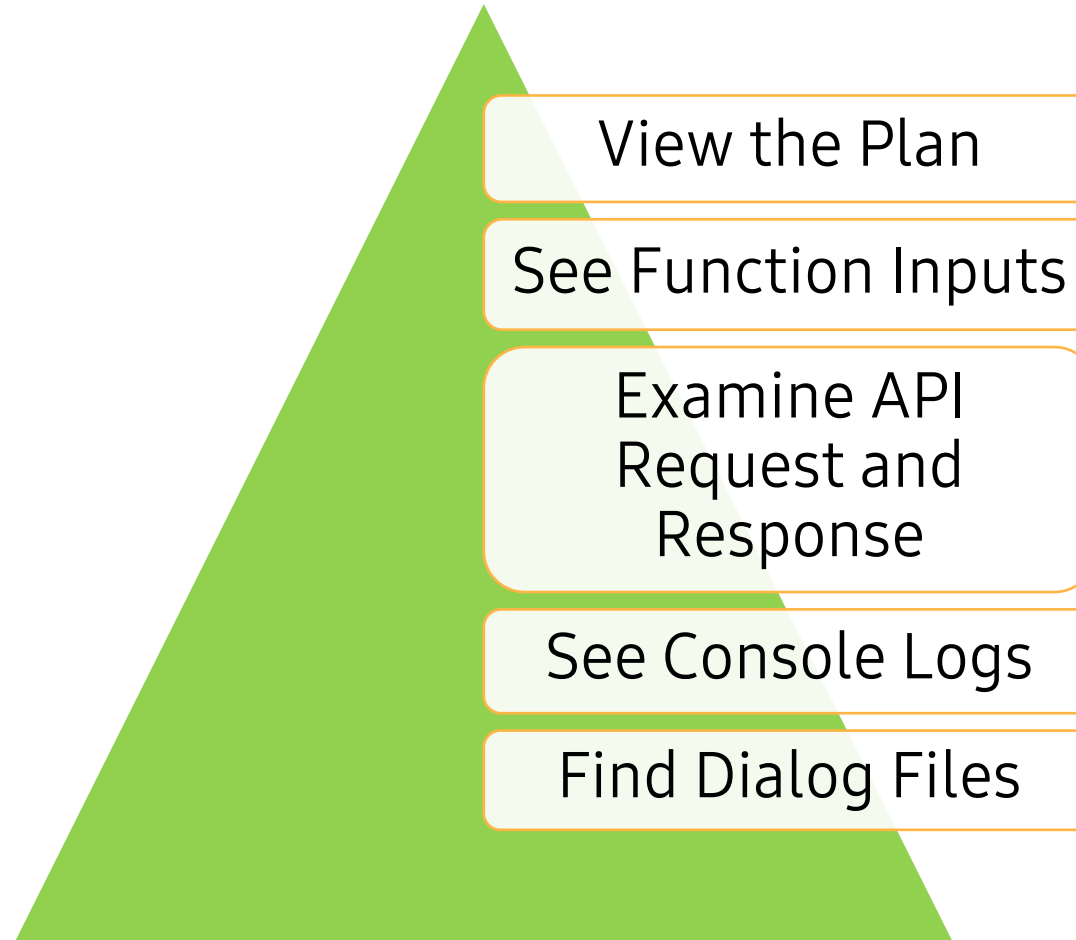

Review Movie Agent

Find Answers with Debug Console

- comes up in a separate window
- you may run it after the Simulator
- analyze what happened on the Bixby platform
- we have questions and we'll use it to find answers

Review Debug Console
