Support

Create or Join a Team

To publish a capsule, you need to be a part of a team. To get started, either create your own team or ask an existing team's admin to invite you.

For more details, see the [Managing Teams & Capsule Access Guide](#).

Create a New Team

Create New Team

Submit, manage, and release your capsules with your collaborators.

Prepare Your Capsule

Prepare your Capsule

- **capsule.bxb**
 - Automatically created
 - Handles the metadata required by Bixby to ensure the capsule contents are rendered correctly
 - Import library capsules
- **capsule-info.bxb**
 - Needs to be created
 - Provides information about your capsule, including the capsule name, website, and related branding images
 - Constrain by Country or Device
 - Place the file in the locale-specific /resources/ folder

capsule-info.bxb

```
description {  
    displayName (Example)  
    companyName (Example, Inc.)  
    iconUrl (/images/icons/example.png)  
    description (Example allows you to see examples of things.)  
    websiteUrl (https://www.example.com)  
    termsUrl (https://www.example.com/TOS.html)  
    privacy-policy-url (https://www.example.com/privacy.html)  
    search-keywords{  
        keywords (Example)  
    }  
    dispatch-name (Example)  
    dispatch-aliases {  
        alias (Example Site)  
    }  
    actionBgColor (#BF2519)  
    actionFgColor (#FFFFFF)  
}
```

Public & Private Submissions

Public & Private Submissions

- **Private**
 - Lets you test whether a capsule is ready for public submission without affecting production environments
 - You continue to have access to previous private submissions of a capsule, even if you make another private submission
 - Technical verification of a Capsule
 - On device testing
- **Public**
 - Submit through Bixby Studio
 - Follow submission guidelines (not published yet)
 - Every submission creates a new version
 - Capsule goes through approval process
 - Rejected capsules will receive feedback

Best Practices

Best Practices

- Follow all submission guidelines
- Provide at least three Hints and test those Hints
- Test variations on Hints
- Test in the Simulator and On Device for all Languages
- Provide a good description
- Do not violate trademarks or copyrights
- Include a privacy policy if you collect data
- Have a unique dispatch name (that is not generic)
- If you call an API, makes sure that API performs well
- Provide any test accounts that are required
- Only request permissions you need
- Punch out only when necessary
